Program at a Glance

Date	Time	Session	Chairperson	Speaker	Title
July 8th	17:30-17:40	Welcome Address			
	17:40-19:00	Keynote Lectures	Kohei Miyazono Elizabeth M. Jaffee	Elizabeth Jaffee (The Sidney Kimmel Cancer Center at Johns Hopkins)	Immunotherapy In The Era of Pecision Medicine
				Yasuhiro Yamada (The University of Tokyo)	Dissecting pancreatic cancer development with advanced animal models
	19:00-19:30	Special Session: Patient and Public Involvment		Yoshiyuki Majima (NPO PanCAN Japan)	Pancreatic Cancer Research and PPI
	19:50-21:50	Welcome Party			
July 9th	8:30-10:00	Session 1: Stromal evolution and tumor microenvironment cross-talk and modeling	Marina Pasca di Magliano Kyoko Hida	Marina Pasca di Magliano (University of Michigan)	Dissecting T Cell Responses in Human and Mouse Pancreatic Cancer
				Atsushi Enomoto (Nagoya University Graduate School of Medicine)	Understanding the biology of cancer-restraining fibroblasts in pancreatic cancer and its clinical application
				Kyoko Hida (Hokkaido University)	Contribution of tumor endotheilal cells in tumor progression
	10:00-10:20	Break			
	10:20-11:50	Session 2: Inflammation	Florencia McAllister Hideaki Ijichi	Florencia McAllister (University of Texas MD Anderson Cancer Center)	Microbial Matters in Pancreatic Cancer: From Inception to Progression
				Akihisa Fukuda (Kyoto University Graduate School of Medicine)	The role of chromatin remodeling regulators in pancreatic cancer
				Hideaki Ijichi (The University of Tokyo)	Shift of Immune-inflammatory Microenvironment in Regulating Pancreatic Cancer
	11:50-12:50	Lunch and Poster View			
	12:50-14:20	Poster Presentation			
	14:20-15:50	Session 3: Genetics, Kras, p53, and oncogenic signaling	Elda Grabocka Masahiro Sonoshita	Elda Grabocka (Sidney Kimmel Cancer Center at Thomas Jefferson University)	Stress-adaptation in Cancer: Role of Stress Granules in Pancreatic Tumorigenesis
				Rieko Ohki (National Cancer Center Research Institute)	Elucidation of the role of the p53 pathway in pancreatic neuroendocrine tumor
				Masahiro Sonoshita (Hokkaido University Institute for Genetic Medicine)	Whole-animal Approaches using Drosophila to Develop Novel Therapeutic Candidates for Pancreatic Cancer Treatment
	15:50-16:10	Break			
	16:10-17:40	Session 4: Tumor heterogeneity, plasticity, and therapy resistance	Rosalie C. Sears Keisuke Sekine	Rosalie C. Sears (Oregon Health & Science University)	Post Translational Activation of MYC Promotes Aggressive, Liver Metastatic Pancreatic Ductal Adenocarcinoma
				Toshiro Sato (Keio University School of Medicine)	Elucidation and control of cancer ecosystem using artificial cancer tissue
				Keisuke Sekine (National Cancer Center Research Institute)	Elucidation and control of cancer ecosystem using artificial cancer tissue
	18:00-19:00	Meet the Expert Evening			
	19:30-21:30	Banquet			

Date	Time	Session	Chairperson	Speaker	Title
July 10th	8:30-10:00	Session 5: Screening and early detection, liquid biopsy, biomarkers, and premalignant lesions	Anirban Maitra Toru Furukawa	Anirban Maitra (UT MD Anderson Cancer Center)	Early Detection and Cancer Interception in Pancreatic Cancer
				Ryoko Katagiri (National Cancer Center Institute for Cancer Control)	Intake and Biomarkers of Metabolites in Cancer Epidemiology: Focusing on Branched-chain Amino Acids and Risk of Pancreatic Cancer
				Toru Furukawa (Tohoku University Graduate School of Medicine)	Intraductal Neoplasms of the Pancreas are Precursor Lesions of Pancreatic Cancer
	10:00-10:20	Break			
	10:20-11:50	Session 6: Clinical oncology and targeted therapies	Nilofer S. Azad Kohei Miyazono	Nilofer S. Azad (Johns Hopkins Univeristy School of Medicine)	Stronger Together: Immuno-Energizing Non-IO drugs in Novel Combinations
				Masashi Kanai (Kyoto University)	Recent Progress of Precision Medicine in the Treatment of Pancreatic Cancer
				Junji Furuse (Kanagawa Cancer Center)	Current status and clinical trials in chemotherapy for pancreatic cancer in Japan
	11:50-12:50	Lunch			
	12:50-14:20	Session 7: Immunotherapy	Stephanie K. Dougan Hiroyoshi Nishikawa	Stephanie K. Dougan (Dana-Farber Cancer Institute)	Phagocidal Macrophages in Pancreatic Cancer
				Yasuyuki Kida (National Institute of Advanced Industrial Science and Technology)	Inhibitor-induced Stromal and Metabolic Reprogramming Enhances Pancreatic Cancer Therapy
				Hiroyoshi Nishikawa (National Cancer Center)	Immunosuppression by Regulatory T Cells in The Tumor Microenvironment
	14:20-14:40	Break			
	14:40-16:10	Session 8: Metabolism, antioxidants, and cachexia	Aaron J. Grossberg Atsushi Ochiai	Aaron J. Grossberg (Oregon Health & Science University)	The role of altered lipid metabolism in pancreatic cancer cachexia
				Masahiro Aoki (Aichi Cancer Center Research Institute)	The landscape of systemic metabolic alterations in cancer cachexia
				Atsushi Ochiai (Research Institute for Biomedical Sciences, Tokyo University of Science)	Targeting inflammation for reversing tumor-microenvironment and cachexia in pancreatic cancer
	16:10-16:20	Closing Remarks
